SOMOS MISSION STATEMENT

To provide a forum for the interchange of medical knowledge as it relates to the practice of orthopaedic surgery in the military.

TARGET AUDIENCE

The 67th Annual Meeting of the Society of Military Orthopaedic Surgeons has been developed primarily for orthopaedic and trauma surgeons.

PURPOSE

The purpose of the SOMOS Annual Meeting is to provide a comprehensive, militarily relevant educational forum that promotes excellence in orthopaedic care within the Department of Defense. The meeting facilitates the exchange of evidence-based advances in orthopaedic surgery, fosters innovation in the treatment of musculoskeletal injuries across the continuum of care, promotes surgeon leadership development, and supports the readiness of military orthopaedic surgeons to manage both combat and non-combat injuries. Through collaboration, education, and shared experience, this meeting seeks to enhance the quality and consistency of orthopaedic care delivered by military medical professionals in diverse operational settings.

OBJECTIVES

At the conclusion of the 2025 SOMOS Annual Meeting, participants will be able to:

1. **Apply** updated knowledge and techniques in orthopaedic subspecialties including trauma, sports medicine, foot and ankle, hand, spine, oncology, and pediatric orthopaedics, particularly as they relate to the unique demands of military populations.
2. **Analyze** current trends in the management of combat-related musculoskeletal injuries and assess their applicability to forward-deployed and resource-limited environments.

3. **Integrate** evidence-based outcomes and innovations, including surgical advancements and rehabilitation strategies, into their clinical practice to improve patient outcomes and operational readiness.
4. **Engage** in peer-to-peer knowledge exchange that promotes continuous learning and leadership development within the military orthopaedic community.
5. **Identify** emerging technologies and treatment modalities relevant to military orthopaedics and evaluate their potential impact on future care delivery.

These objectives will be achieved through a robust scientific program including podium presentations, instructional courses, symposia, case panels, poster sessions, and keynote lectures.
